An aerial photograph of a modern, two-story house with a green roof. A white car is parked on a paved driveway. The house has large windows and a glass-enclosed upper level. The surrounding landscape is lush with greenery and some rocks. Dashed white lines connect text labels to specific parts of the house and driveway.

TOONA 5

SOLEMYO OPERA BLUEBUS 24V 230V

For swing gates with leaves up to 5 m.

Electromechanical gear motor, surface mounted.

Also available in 24 Vdc version,

with magnetic encoder.

Ideal for residential and industrial use.

Reliable: durability thanks to the housing, made up of two tough aluminium shells with polyester paint finish; more resistant to atmospheric agents.

Internal moving parts completely in steel, light alloys and technopolymers.

T05024I ideal for intensive work load, thanks to the torque of 2200 Nm, can work on continuous duty on large sized gates.

Silent: patented layout of internal parts and lead nut in bronze.

Generously sized and practical connection compartment:

rapid and easy access from above to internal parts located in the upper section of the motor.

Simple installation and maintenance,

with built-in capacitor.

Recommended control units:

Mindy A6F, A60, A700F;

for T05024 and T05024I Moonclever MC824H.

24 Vdc version with magnetic encoder.

Perfect for intensive use, compatible with the control unit

Moonclever MC824H:

simple programming, by means of a single key;

self-learning of opening and closing limit positions;

automatic fault diagnostics;

programming of pause time;

pedestrian pass door;

deceleration on opening and closing;

obstacle detection with dual technology;

operation in event of power failure by means of optional

rechargeable batteries (PS324);

provision for connection of latest generation resistive

sensitive edges.

WALKYKIT 1024

SOLEMYO OPERA BLUEBUS 24V

For swing gates with leaves up to 1.8 m.
Especially suited to gates in wood or PVC.
Irreversible electromechanical gear motor at 24 Vdc, with articulated arm.

Ultra compact: ideal for pedestrian gates, recommended for small posts (width 8 cm).

Safe: thanks to the irreversible motor and anti-shear arm with built-in mechanical stop on closure (with installation of entire arm).

Practical: the articulated arm enables installation in specific conditions, such as in the presence of small walls or obstacles adjacent to the post.

Quick: no waiting in front of the gate, just 7 seconds to open or close (in optimal installation conditions, with reduced arm and 90° opening).

Convenient: incorporable flashing LED indicator, with courtesy light function (WLT, optional); rapid motor release for manual movement of the gate.

Built-in control unit:

- simple programming;
- self-learning of opening and closing limit positions;
- automatic fault diagnostics;
- programming of pause time;
- pedestrian pass door;
- deceleration on opening and closing;
- provision for connection of latest generation resistive sensitive edges.

No black out: operation in the event of a power failure by means of optional batteries (PS424) housed inside the motor.

HOPPKIT

SOLEMYO OPERA BLUEBUS 24V

For swing gates with leaves up to 2.4 m, ideal for large columns.

Irreversible electromechanical 24 Vdc gear motor with articulated arm, surface mounted. Ideal for intensive use.

Two irreversible 24 Vdc versions with micrometric adjustment mechanical stops on opening and closing: with built-in control unit (H07124) and without control unit (H07224).

Powerful thanks to the 250 Nm torque.

Resistant and compact: 180 mm in width, ideal for any kind of post. Small shockproof body with aluminium base.

Sturdy, aluminium anti-shearing arm.

Easy to install: thanks to the new fixing bracket with quick connector for the motor. No welding.

Sophisticated electronics with the built-in control unit, just 3 keys to manage all programming operations: obstacle detection and possibility of connecting to 8.2 KOhm sensitive edge, fototest; automatic fault diagnostics; memorisation of opening and closing travel limits in self-learning mode; possibility of configuring the stop input in self-learning mode, NO, NC and the latest generation 8.2 KOhm resistive sensitive edges: deceleration on opening and closing; simple connection of pairs of additional photocells, foto2; programming of pause time; pedestrian open and partial open; clutch with anti-crushing safety mechanism.

Energy saving with no black outs:

3 standby modes to reduce mains consumption, or battery power consumption if connected to the Solemyo kit. Operation in the event of a power failure thanks to the optional batteries (PS124).

Everything under control: thanks to compatibility for operation with Opera system BUS T4, the unit can be used to expand the options of programming, control and diagnostics of the automation on site and remotely.

The new Era Gate accessories, with a minimal, modern and discreet design, renovate Nice kits style and performance.

For swing gates with leaves up to 3.5 m, ideal for large columns.

Irreversible electromechanical 24 Vdc gear motor with articulated arm, surface mounted.
Ideal for intensive use.

Quality and durability thanks to the housing in aluminium with polyester paint finish, resistant to atmospheric agents.

Ultra-powerful and delicate: thanks to the torque of 500 Nm and encoder technology, for millimetric precision and reliability. Safety in movement with dual technology obstacle detection.

Two irreversible 24 Vdc versions with limit switches on opening and closing: with built-in control unit (HK7024) and without control unit (HK7224).

Adjustable anti-crushing arm

Practical and quick installation:
the articulated arm is adjustable in length for maximum flexibility.

Simple and precise limit switch adjustment:
mechanical stops and micrometric adjustment screws.

Easy to operate release lever, with metal lock and personalised Nice key. With provision for cable control.

Savings, respect for the environment, and autonomy:
when connected to the buffer battery or Solemyo kit, consumption on standby is just 0.1 W.

No black out: with the optional batteries (PS124) housed inside the gear motor.

Built-in control unit (HK7024):
simple programming via a single key;
self-learning of opening and closing limit positions;
automatic fault diagnostics;
pause time programming;
pass door;
deceleration on opening and closing;
obstacle detection with dual technology;
provision for connection of latest generation sensitive edges.

The new Era Gate accessories, with a minimal, modern and discreet design, renovate Nice kits style and performance.

SOLEMYO 24V

For swing gates with leaves up to 2.3 m, underground installation, ultra compact.
Irreversible electromechanical 24 Vdc gear motor.

Sturdy and discreet: compact foundation box with a height of only 81 mm.
Steel with cathaphoresis paint finish guarantees optimal resistance to corrosion, and thickness of 2.5 mm guarantees strength. All this in a protrusion of just 52 mm from the ground.

Practical and quick installation
thanks to the exit lever on the gear motor attached directly on the leaf.

Mechanical limit switches
adjustable on opening and closing.

Opening up to 180° as standard.

Reliable and sturdy: the gear motor, in IP67 pressure die cast aluminium, suspended inside the housing to enable drainage of any deposits, ensures optimal water resistance.

Practical release from inside and outside, acting directly on the gear motor, easy to operate by means of the special key.

Moonclever control unit MC424L:
easy programming by pressing a single button;
clutch with anti-crush safety feature;
automatic memorization of limit switches on opening and closing with self-learning function;
programming of pause time;
pedestrian pass door;
deceleration on opening and closing;
obstacle detection;
provision for connection of latest generation resistive sensitive edges;
continues to work even during power failures using optional (PS124) batteries that fit inside the control unit.

SOLEMYO OPERA BLUEBUS 24V 230V

For swing gates with leaves up to 3 m, underground installation.
Irreversible electromechanical gear motor, also available in 24 Vdc versions with magnetic encoder.

3 types of electromechanical gear motors irreversible **M-Fab**.

2 foundation boxes externally chamfered, Fab Box, with mechanical stop on opening:

in stainless steel (XFABBOXI), ideal for use in extreme conditions,
with the **cataphoresis paint finish** (MFABBOX), highly resistant to corrosion.

Reliable and resistant: motors made up of solid internal parts in metal. New IP67 waterproof die cast aluminium.

Total freedom of choice: release from inside and outside, two key-operated models or freely compatible lever version and easily activated with just one hand.

Simple to use: mechanical stop system on closure. Standard opening max. 110°, optional opening 360°.

Totally compatible with the previous Metro series.

Recommended control units: Mindy A6F, A60, A700F; for MFAB3024 Moonclever MC824H.

NAKED SLIDING 400

SOLEMYO OPERA BLUEBUS 24V

Nice concealed motor for sliding gates up to 400 Kg with leaf length up to 6 m.

Motor with built-in control unit and absolute encoder which can be installed inside a compact post with suitable holes.

Its **extremely small size** allows the motor to be installed even in very slender posts, with interior size down to 140x140 mm.

User-friendly: thanks to the BlueBUS system, allowing the control unit to be connected to up to 7 pairs of photocells and control, security and signalling devices with just two wires.

State-of-the-art: it features a temperature sensor that adapts the motor force to weather conditions, also modulating the overload protection.

Master/slave selection: for automatic synchronisation even of 2 motors, allowing automation of sliding gates with two opposing leaves.

Intelligent: thanks to obstacle detection and automatic working time programming. Self-diagnostics with flashing light signalling.

Safe: adjustable acceleration and deceleration at the start and end of every opening and closing operation.

User-friendly, precise limit switch adjustment: integral absolute limit switch, quick learning with just one opening or closing operation with motor released.

Practical: control unit and optional PS124 buffer batteries can be connected by means of practical guided - connector.

Flexible: unlocking can be provided on both sides of the post and/or on the outside (with the K10 and KA1 accessories). Also easy to install on existing posts.

SLIGHT

SOLEMYO OPERA BLUEBUS 24V

Nice motor for sliding gates up to 400 kg with leaf length up to 6 m.

Motor with built-in control unit and absolute encoder.

Innovative ultra-compact design: the vertical configuration of the motor makes it easy to install even in narrow openings.

User-friendly: thanks to the BlueBUS system, it allows the control unit to be connected to up to 7 pairs of photocells and control, security and signalling devices with just two wires.

Built-in LED light: programmable as either a flashing or courtesy light, it warns of gate movement during opening and closing.

Master/slave selection: for automatic synchronisation even of 2 motors, allowing automation of sliding gates with two opposing leaves.

Intelligent: thanks to obstacle detection and automatic working time programming. Self-diagnostics with flashing light signalling.

Safe: adjustable acceleration and deceleration at the start and end of every opening and closing operation.

Built-in absolute limit stop: simple and precise regulation thanks to the rapid learning in a single movement with the motor released; no bracket or accessory to be installed on the ratchet; particularly suitable in snow areas.

Practical: control unit and optional PS124 buffer batteries can be connected by means of practical guided - connector.

ROBUS 400/600/1000

SOLEMYO OPERA BLUEBUS 24V

For sliding gates weighing up to 400 kg (RB400), up to 600 kg (RB600) and up to 1000 kg (RB1000).

Versions with electromechanical limit switch (RB400/RB600/RB1000) and with inductive limit switch (RB400P/RB600P/RB1000P).

User-friendly: the Nice BlueBUS technology, enables to power and control a maximum of seven couples of photocells using two wires only.

Practical: the control unit and PS124 buffer battery (optional) can be connected by means of a simple connector and can be housed directly inside the motor.

Advanced: RB400, RB600 and RB1000 are equipped with a temperature sensor: adapt the motor power to the climatic conditions and at the same time thermal cut-out. A master/slave selection automatically synchronises two motors. This means it is possible to automate 2-leaf sliding gates set opposite each other.

Intelligent: thanks to the obstacle detection system and automatic programming of the working times. Self-diagnosis by means of a flashing light. 8 programming levels.

Safe: acceleration and deceleration can be adjusted at the beginning and end of each opening and closing manoeuvre.

Sturdy: base and release in pressure die cast with easy to open handle.

Very quiet: gear motor on bearings.

RUN 1800/2500

OPERA BLUEBUS 230V

For sliding gates weighing up to 1800 kg (RUN1800) and up to 2500 kg (RUN2500).

Ventilated motor with inductive limit switch (RUN1800P/RUN2500P) or electromechanical limit switch (RUN1800/RUN2500I/RUN2500).

Suitable to operate in extreme conditions, in systems for intensive use.

Simple to install: the BlueBUS system enables connections by means of just two wires between the control unit and up to 15 control safety and signalling devices.

Safe: the acceleration settings (at the start of the manoeuvre) and the deceleration settings (at the end of the manoeuvre) are precise and reliable.

The temperature sensor: Run is able to manage force, adapting it to the different climatic and environmental conditions, while adapting the thermal cut-out protection and intensity of self-ventilation, depending on the temperature reading.

A **master/slave** selection also automatically synchronises 2 motors, enabling the automation of sliding gates with two opposing leaves.

Practical and functional: the control unit (and inverter on version RUN2500I), housed inside Run, can be simply connected by means of the practical connector guide.

Very quiet: gear motor on bearings.

RUN2500I version with built-in inverter

Perfect movement: the inverter enables the power supply and drive of the 3-phase motor with single-phase current at 230 Vac, acting on the frequency to adjust speed of the automation from a minimum of 8.2 m/min to maximum 15.4 m/min.

In the automation deceleration phase, the inverter, which dialogues with the control unit, increases the torque, thus improving performance and reducing the risk of the automation blocking on impact with obstacles.

TUB

400V

For sliding gates weighing up to 3500 kg.

Ideal for industrial use.

Irreversible electromechanical 400 Vac gear motor with built-in Mindy A500 control unit.

Powerful:

550 W absorbed output and a peak thrust of over 400 Nm.

Functionality and safety:

programmable, electronic brake which prevents gate inertia; self-ventilated motor to increase the working cycles; optional PIU card to increase the basic functions.

Maximum durability and silence:

bronze and metal gears.

Advanced:

Tub meets all requirements in terms of control, thanks to the functions which can be selected by means of dipswitches.

Practical:

the lever release enables safe and simple operation.

VENTILATED MOTOR TO INCREASE
WORK CYCLE EFFICIENCY

SOLEMYO OPERA BLUEBUS 24V

Electromechanical road barrier system for control of road access.

24 Vdc gear motor with built-in control unit.

For bar up to 4 m.

Strength and reliability: robust structure in steel, new high strength balancing springs guaranteed up to 500,000 opening and closing operations and elliptical section bar with high wind-gust resistance.

Optional flashing or traffic light can be integrated in cover.

More comfort and safety in programming and maintenance phases: the separate enclosures for electronics and mechanics protect internal parts from potential risks.

Rapid and easy access to the control unit located in the upper section of the barrier body.

Simple fixture of the completely concealed photocells onto the specially designed seats on the barrier body.

More safety and reliability: obstacle detection and monitoring of motor absorption during automation movement.

Automatic fault diagnostics during operation with consequent signalling of fault type through specific flash sequences.

Provision for connection of latest generation optical and resistive sensitive edges (with 8.2 KOhm resistance).

Energy saving: the system sets to standby when not in use to save consumption.

No blackouts: emergency backup power with the optional batteries housed inside the case.

Release from side with Nice triangular key, can be installed on either side.

Electromechanical road barrier system for control of road access.

24 Vdc gear motor, with built-in control unit, adjustable speed and anti-crush safety function.

Two types of case available, galvanized steel or stainless steel (AISI 304) in **three sizes** from 3 to 7 metres long.

More comfort and safety in programming and maintenance

The same built-in control unit is used on all versions, and is installed in the bottom part of the barrier body. Large front door for quick and easy access. Easily-removable reinforced gear motor support.

Maximum anti-crush safety

when both opening and closing; barrier body supports on the inside for minimum visual impact.

Electronically-adjustable speed from 3.5 (Wide M) to 5 (Wide L) for fast opening.

Sturdiness, reliability and easy installation

Elliptical section bar for lighter weight and higher wind-gust resistance; special profile for fast assembly of the accessories.

Optional pivot joint to protect the barrier in the event of collision.

The bar can be assembled either on the right or left.

Easy to balance, thanks to practical spring tension adjustment.

No blackouts: operation is guaranteed in the event of power outages by the PS234 backup battery installed inside the control unit.

Release with triangular key protected against the weather.

IN ORDER TO HAVE A FULLY FUNCTIONAL BARRIER GATE OPERATOR SYSTEM:

1. CHOOSE THE GEAR MOTOR

2. SELECT THE BAR

3. COMPLETE THE SYSTEM WITH THE OPTIONAL ACCESSORIES

For sectional doors up to 12.5 m² and up-and-over garage doors up to 11.8 m². Irreversible electromechanical gear motor, for residential use, with belt drive, 24 Vdc motor, with magnetic encoder.

Complete version of the guide in 3x1 m sections.

Rapid installation - anywhere!

The adjustable head, cord-type release and cable-controlled, step-by-step release can be fitted in any part of the garage in order to actuate the system without a remote control device and without the need to install wall-mounted control units!

THREE-SECTION GUIDE
IN GALVANISED STEEL
WITH BELT DRIVE SYSTEM,
VERY QUIET

Guaranteed savings and respect for the environment: with the connection to the mains in standby mode the control unit with radio connected consumes just 0.8 W (SPIN30) and 1.2 W (SPIN40); when connected to a battery or to the Solemyo kit, consumption in standby mode is reduced to 0.036 W.

User-friendly thanks to the BlueBUS system: which enables connection by means of just two wires between the control unit and pair of photocells.

Safe: obstacle detection system and automatic programming of the working times; motor absorption is monitored during movement, self-diagnosis by means of a flashing light and courtesy light. Acceleration and deceleration can be adjusted at the beginning and end of each opening and closing manoeuvre. Can be connected with latest generation sensitive edges 8.2 KOhm.

Luminous: 40 W lamp that can be used as garage lightning.

SOON

SOLEMYO OPERA BLUEBUS 24V

For sectional doors* up to 20 m².
24 Vdc electromechanical gear motor
with absolute encoder.

*For balanced sectional doors equipped with anti-crash
(safety device useful in case of spring breaking).

Easy to install: Soon can be fitted directly onto the shaft
of a sectional door; compact, particularly in width, in order
to make assembly easy in any position.

User-friendly thanks to the BlueBUS system
that enables users to connect the photocell couples
and control unit using just two wires.

Practical: the control unit and PS124 buffer battery (optional)
can be connected by means of a simple connector and can be
housed directly inside the motor.

Energy saving: when the system is not being used it will
switch over to standby.

Reliable and precise: memorization of limit switch positions
on opening and closing; gradual starting and slowdown during
closing; the absolute encoder technology guarantees precision
without the need of a limit switch, reliability and long term
safeguard of the set values.

Safe: obstacle detection system; motor absorption is monitored
during movement, self-diagnosis by means of a flashing light
and courtesy light.
Last generation of 8.2 KOhm optical and sensitive edges can also
be connected.

SUMO

24V

For sectional doors and two-wings sliding doors up to 35 m².

24 Vdc electromechanical gear motor with magnetic encoder, no need to adjust limit switches.

Perfect for intensive use.

Revolutionary aesthetics: compact, particularly in width, in order to make assembly easy in any position; quick to install.

Easy to install: Sumo can be fitted directly onto the shaft of sectional doors.

Perfect for Ø 25.4 mm shafts and can be used also with Ø 31.75-35-40 mm shafts thanks to the CRA9 adapter.

Many different functions with the separate Mindy A924 control unit:

- automatic memorization of limit switches on opening and closing;
- gradual departure and slowdown during closing;
- integrated battery charge card with optional battery power supply in the event of power failures easy programming by pressing a single button;
- pause time programming and speed adjustment;
- service warning light for maintenance (can be programmed according to the number of manoeuvre required).

HYPP0 7100

SOLEMYO OPERA BLUEBUS 24V 230V

For 2-leaf folding doors.

Electromechanical gear motor irreversible with telescopic arm, also in 24 Vdc version, with magnetic encoder.

Single model for right and left leaves.

Pre-wired, **incorporated double limit-switch** both during opening and closing: fewer connections mean quicker installation (for HY7100 only).

Solid metal mechanics.

Sturdy, galvanised, telescopic arm.

Recommended control units:

for HY7100 Mindy A6F, A60, A700F;

for HY7124 Moonclever MC824H.

24 Vdc version with magnetic encoder.

Perfect for intensive use, compatible with the control unit Moonclever MC824H:

simple programming, by means of a single key;
self-learning of opening and closing limit positions;
automatic fault diagnostics;
programming of pause time;
pedestrian pass door;
deceleration on opening and closing;
obstacle detection with dual technology;
operation in event of power failure by means of optional rechargeable batteries (PS324);
Can be connected with latest generation sensitive edges 8.2 KOhm.

SIMPLE SOLUTIONS FOR COMPLEX INSTALLATIONS

www.latmet.com

Nice offers simple safe solutions to manage a large number of automations, lighting points and electrical loads.

MANAGING A "GROUP"

Era Screen transmitters can be used to control single automations, automation groups and multigroups.

To connect a group of similar automations (gate only, awnings only) to a single key, during programming all the automations you want to activate together must be associated with that key.

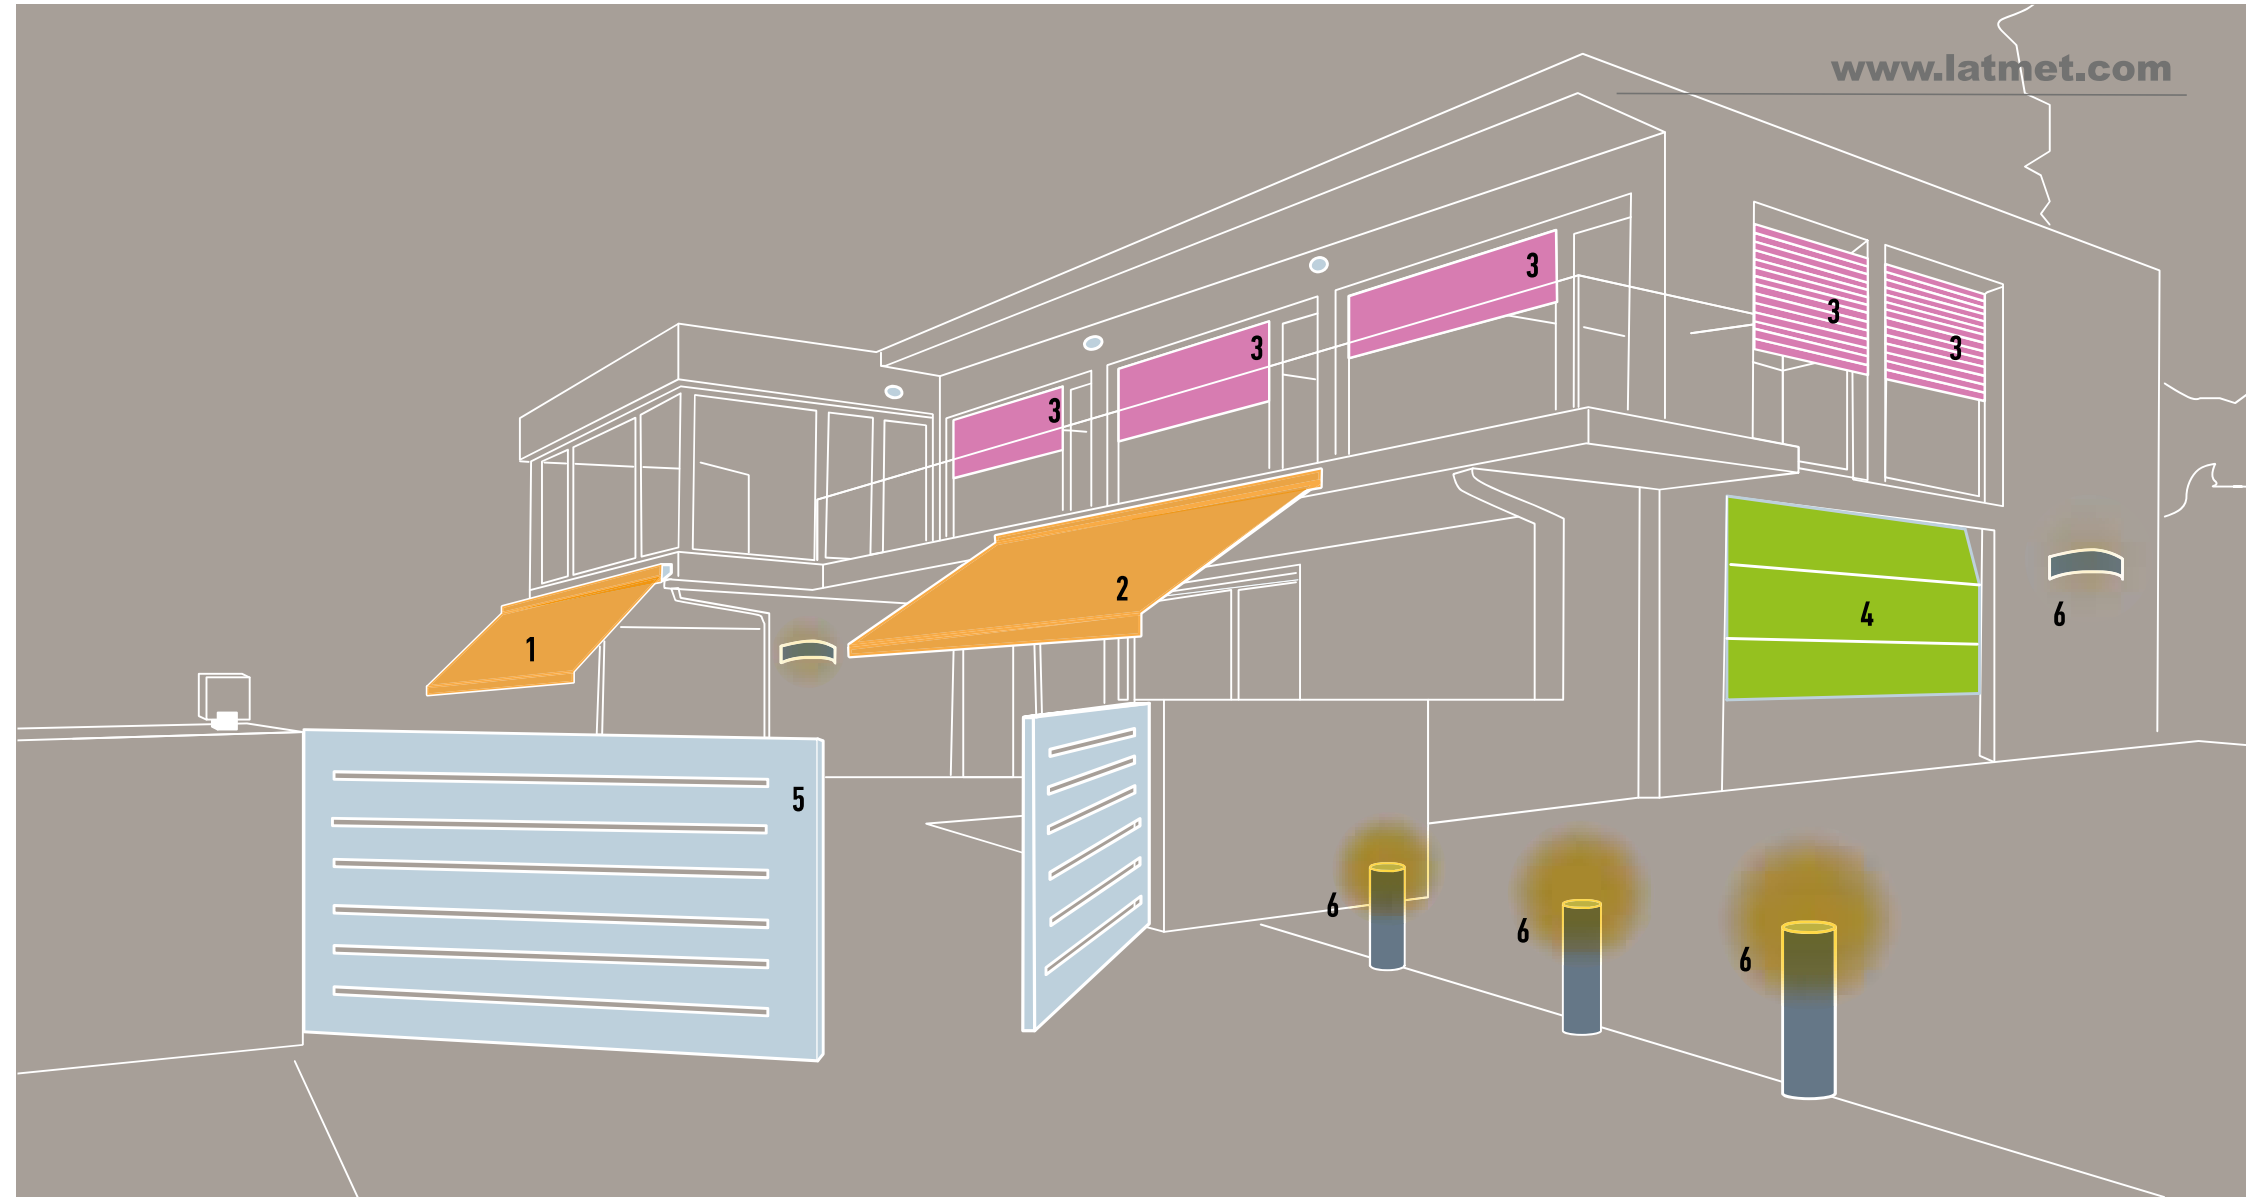

MANAGING MULTIGROUPS

With 6-channel transmitters, groups of different automations (awnings and rolling shutters) can also be created. These are known as multigroups.

INTEGRATION WITH OTHER SYSTEMS

As well as automation, transmitters in the Era line can also be used to manage outdoor lighting. For example, if you connect the outdoor lights (for a maximum power of 1000 W/500 VA) to a receiver and a TT2L control unit, you can select one of the keys on the transmitter to control all of them together.

ERA P VIEW

NEW

Multifunction radio transmitter with intuitive graphic interface, LCD colour screen (2.2) navigation by 5-key joypad.

To manage up to 99 devices singularly or in groups (20 zones, groups or scenarios).

With clock and calendar to configure timed commands.

Advanced programming for professionals!

The installer can access the transmitter and receiver programming and modify and create types and sets of commands. Direct access from first start-up by inserting the batteries or subsequently using the keys on the back of the transmitter.

Easy to use for all requirements: can be used in either simple or advanced mode.

Advanced Users

Can modify the transmitter settings and the labels identifying the devices and create, time, modify and control zones, groups and scenarios. They can also limit access to the advanced menu by a numerical password.

Easy Users

Can simply and directly control a small number of devices pre-authorised by the advanced user. They can consult the dashboard and suspend timed events.

Practical and functional.

If not used for a few seconds, Era P View switches to stand-by to reduce battery consumption. Thanks to the built-in sensors, the device comes on again automatically when removed from the wall support or moved, or if any key is pressed.

USB socket: to recharge the batteries (if rechargeable).

With practical magnetic support for fixing to the wall.

ERA TOUCH

Touchscreen to control Nice automations and manage the NiceHome alarm system

The **wireless Nice Era touchscreen** can manage all home automations, thanks to remote control of:

- a maximum of 99 single controls,**
- up to 10 groups of controls,** to manage a number of automations of the same type simultaneously;
- up to 10 single scenarios,** to manage different automations, including those associated with the alarm system.

By using Nice TT2L or TT2D miniaturised control units and/or universal receivers (es. SMX2R etc.) **you can manage light, irrigation and heating** (convector heaters, etc.).

Automations, groups and scenarios can be controlled in time bands thanks to the built-in weekly and hourly programmer.

Simple programming, configuration and control of the alarm system, with **intuitive graphic display, built-in vocal guide and bidirectional technology**.

Built-in proximity transponder badge reader for the management of alarm system: each individual key can be personalised for the single user and individual zones.

Thanks to the bidirectional wireless communication with the alarm system, the touchscreen displays alarm system status, indicating the status of each individual zone by means of simple icons.

Main functions:

Management of Nice automations with **FLOR** encoding: it can control up to 99 single automations divided into sun screens, gates, garages and lighting.

Simultaneous management of the controls for blinds, shutters and sun screens automated with Nice tubular motors.

Control of single automations, groups of automations and the execution of scenarios, with the possibility of attributing a name to each automation.

Management of timed controls through the built-in weekly and hourly programmer.

Four programmable buttons to control automations and/or groups and/or scenarios.

Scenarios combined with event notifications enable the garden lights to be turned on and/or the shutters to be closed in the event of an alarm in the garden.

Easy to update thanks to the mini-USB connector.

ERA INTI

The colourful line of 1 and 2 channel miniaturised transmitters, available in six colours.

433.92 MHz rolling code, with management of Identity Codes and Certificates, self-learning and built-in proximity receiver; with 72 bit 0-Code encoding, also compatible with receivers with Nice FLOR encoding.

Evolved: uses data processing and recognition systems that increase its degree of security and deliver a threefold reduction in automation response times.

Easy memorisation, even at a distance, thanks to Opera receivers.

There are two options for enabling a new Inti transmitter, even at a distance from the system:

using a transmitter already programmed in the receiver, thanks to the enabling **Code exchange** between the two (figure 1);

using the Nice O-Box connection interface; the receivers **Certificate** is entered by just placing the new Inti next to the O-Box and following the guided procedure on a PC or PDA (figure 2).

Safe, if a transmitter is stolen or lost, with the O-Box the user can:

replace it, maintaining the same functions as in the previous one, **disable** the old transmitter by increasing the priority level on the new Inti.

Inti can be used as keyring thanks to the lace included in the pack.

The system includes 1, 2, 4 and 9 channel transmitters and prewired receivers with connector, with and without built-in transmitter.

433.92 MHz rolling code, with management of Identity Codes and Certificates, self-learning and built-in proximity receiver; with 72 bit 0-Code encoding, also compatible with receivers with Nice FLOR encoding.

Available in versions with multiple input sequential encoding (Era OneC).

Evolved: uses data processing and recognition systems that increase its degree of security and deliver a threefold reduction in automation response times.

Easy memorisation, even at a distance, thanks to Opera receivers.

There are two options for enabling a new transmitter, **even at a distance from the system:**

- using a transmitter already programmed in the receiver, thanks to the enabling **Code exchange** between the two (figure 1);
- using the Nice O-Box connection interface; the receivers **Certificate** is entered by just placing the new Era One next to the O-Box and following the guided procedure on a PC or PDA (figure 2).

Safe, if a transmitter is stolen or lost, with the O-Box the user can:

replace it, maintaining the same functions as in the previous one, **disable** the old transmitter by increasing the priority level on the new Era One.

Extremely practical: using the O-Box software, the Era OneC version allows whole packs of 10 devices to be programmed in a single procedure, without even opening them!

Elegant and convenient: the Era One transmitter can be used as a stylish, high-tech keyring or fixed to the wall or your cars dashboard with the handy support included in the pack.

Era OneFM, ideal for use in cities or places where many devices are present.

868.46 MHz Rolling Code transmitter line, using frequency modulation (FM), less sensitive to interference than amplitude modulation AM.

POSSIBLE MEMORISATION USING NICE O-BOX AND THE CERTIFICATE.

ERA FLOR

1, 2 and 4 channel transmitters with a new stylish design.

433.92 MHz rolling code system with self-learning function.

Also available in versions with multiple input sequential encoding (Era FlorCE).

Absolute security: rolling code transmission makes the transmitter impossible to clone.

Ideal solution for the management of multi-user apartment block systems thanks to the unique, personal code.

Easy duplication of new transmitter close to the system by using an authorised transmitter or directly using a key on the receiver, while a LED displays the various functions.

Extremely practical: using the O-Box programming unit, the Era Flor-CE version allows whole packs of 100 devices to be programmed in a single procedure, without even opening them.

The O-Box and dedicated software applications for PC and PDA allow:

quick, user-friendly programming of receivers and transmitters;

management and printout of code list;

creation of individual **installation databases** (useful in multi-user systems).

Optimal autonomy and low consumption.

Elegant and convenient: the Era Flor transmitter can be used as a stylish, high-tech keyring or fixed to the wall or your car's dashboard with the handy support included in the pack.

Total compatibility with previous Flor series receivers (universal, universal modular and with Nice or SM connector) and with the One receivers (OXI/OXIT, OX2/OX2T and OX4T).

Modular control system

to manage the range of Nice automations from any point within the home.

Modular

The NiceWay system is based on a number of transmitter modules that can be placed in five different holder models to create a flexible range of made-to-measure solutions. Although the modules, available from 1 to 80 groups or 240 channels, are very small in size, they are extremely easy to operate.

Advanced and compatible

Frequency of 433.92 MHz, 52 Bit Rolling Code with (over 4.5 million of billion combinations); self-learning function. Compatible with the 433.92 MHz Nice Ergo, Plano, FloR and VeryVR systems (Flo and Smilo with WM240C and WM080G). Estimated range: 200 m in a free field, 35 m indoors. Extended battery life (3 V lithium battery).

All the NiceWay solutions

The 240 channel module with display, which controls 80 groups and 70 multi-groups, is ideal for the management of sophisticated systems. All the awnings, roller shutters and gates, as well as the office, home and hotel irrigation and lighting systems in just 14 g and 16 cm²!

Made-to-measure

To protect the electronic parts from dirt and damp, the rubber function buttons are incorporated in the actual body of the control modules. NiceWay can be used anywhere in the home, in the garage, the living room, the kitchen as well as the bathroom.

Professional

For a more professional and practical use, the system can be programmed by means of the handy Nice palmtops.

STONE

NiceWay - Stone Portable and table-top supports.

Fetching and practical

With Stone the radio control device becomes even more functional and catching.

In shock-proof rubber to completely protect the transmitting module, fully directional for greater reception, Stone is available in neutral or bright colours so as to perfectly blend into modern or elegant homes.

Comfortable anywhere

Resistant to the most violent of shocks and garden humidity, Stone is always easy to find, be it on the living room or office coffee table, on the kitchen worktop, in the bathroom or on the side of the pool.

ONDO

NiceWay - Ondo Portable, wall mounted and table-top supports.

Portable, from table to wall

Ondo is the versatile NiceWay line support; the wall support with its simple magnetic fixing system, transforms Ondo from a comfortable portable transmitter to an inconspicuous wall plate.

Ondo, made in a shiny dirt-resistant plastic, has a rubber lower section to improve grip and prevent slipping when used on surfaces.

The transmitter module can be inserted so that Ondo can be used both in width and in length to increase the personalisation possibilities.

RECEIVERS

ERA INTI, ONE, FLOR, NICEWAY

The complete line of receivers with Opera system functions, suitable for all installation requirements:

with connector, compatible with latest-generation Nice control units with SM port;

universal prewired, for use with all types of control unit, for the control of any automation, lighting or irrigation system or other electric circuits.

Maximum flexibility:

up to 1024 transmitters can be memorised.

Convenient and practical:

the inclusion of a transmitter in the OXIT/OXITFM, OX2T/OX2TFM and OX4T receivers allows radio codes to be accessed by means of the O-Box multifunction interface even when in inaccessible positions (figure 3).

OXIT/OXITFM, OX2T/OX2TFM and OX4T receivers can be used as signal repeaters to increase the operating distance between transmitters and other One series receivers (figure 4).

Secure use, thanks to the 3 password-protected levels.

The O-Box and dedicated software applications for PC and PDA allow:

quick, user-friendly programming of receivers and transmitters;

management and printout of **code list**;

creation of **individual installation databases** (useful in multi-user systems).

SM plug-in receiver with Flor system functions, step-by-step and anti-burglar functions.

Management of multi-user system through the unique, personal code: the recognition receivers can receive and memorise up to 255 codes.

Memorisation: a particular receiver output can be associated to each transmitter key (e.g. key 3 TX= output 1 RX).

Opera Control, advanced management of automation systems also at a distance.

The innovative Opera system enables the installer to manage, program and control automation systems, also remotely, simply and safely, with significant savings in time.

The **Opera** system comprises transmitters and **One** series receivers, the **O-Box** connection interface and the communication **software O-View Software Suite** and **O-Box Software Suite**.

All components communicate via **BUS T4** or the new **O-Code** Rolling Code system, making transmissions safer and reducing automation response times.

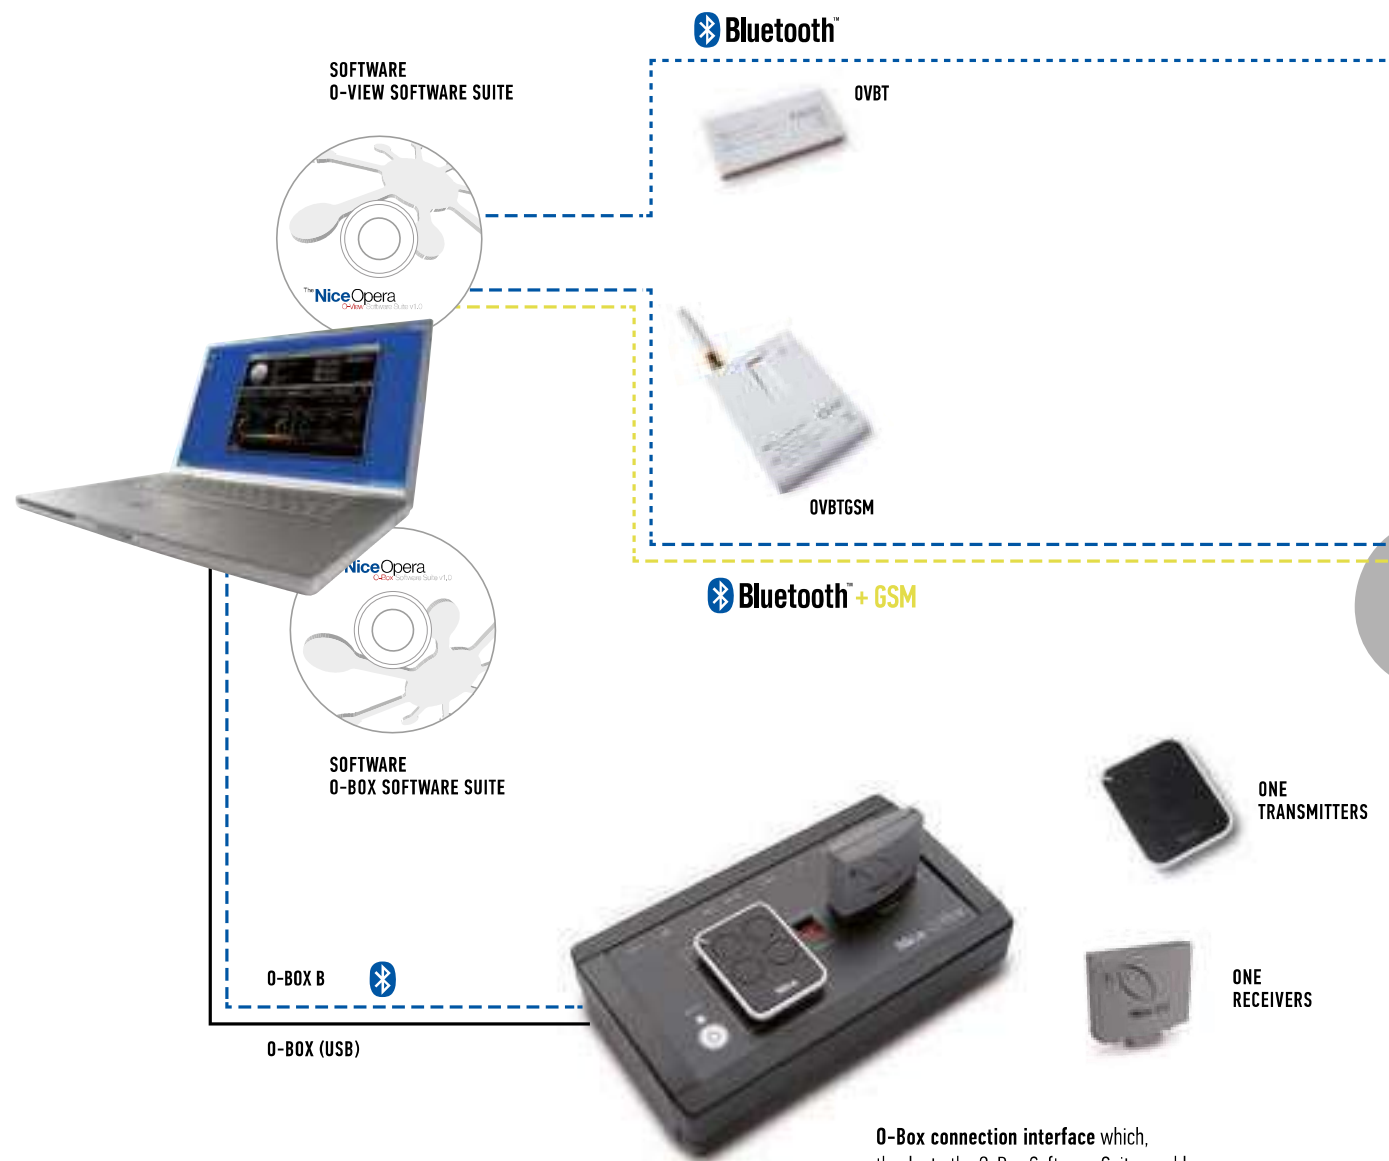

Nice Opera simplifies the installers work, making for easier programming, and enabling access to all control panel parameters to adapt the system to all requirements. No specific procedures needed for each product: single programming mode with intuitive menus, with no need to consult instructions.

Constantly efficient assistance for all customers:

Simplifies system programming by means of the **O-View** multifunction display which when connected directly to the control panels compatible with the Opera system via **BUS T4**, enables full access to the system functions, for practical, rapid and advanced programming.

BUS T4 is the innovative communication protocol that enables you to create extensive networks of compatible automation systems, managing them from a single point via **O-View**.

Device management can be protected by two password levels. By interfacing the system with the PC, you can control a complex automation system such as those found in densely frequented buildings (hospitals, hotels, companies, etc.).

O-Box connection interface which, thanks to the **O-Box Software Suite**, enables the configuration and programming of all Nice control devices, from the PC or PDA.

O-VIEW

OPERA

Unit for control, programming and diagnostics for devices equipped with BUS T4 connection, on site or remotely via GPRS thanks to the connection with your PDA, Smartphone or PC.

Advanced management: O-View is connected directly to the compatible control unit via a BUS T4 cable (supplied). By connecting O-View permanently to a control unit or group of control units via BUS T4, a network can be created for local or remote centralised management.

Simple programming mode with intuitive menus valid for each product, with no need to consult the specific instructions.

O-View powers up and automatically recognises all devices on the network as soon as it is connected, displaying only the specific parameters of the device on which to intervene.

In the case of several devices on the network the BUS T4 address is identifiable by means of a text label personalised as required, enabling rapid recognition of the associated device.

Programmable: thanks to the built-in clock, it is also possible (with integrated backup battery) to program delivery of commands at a set time, for example to automate opening and closing of complex industrial and commercial systems or for the creation of scenarios.

A practical wall-mounted support supplied.

Safe: two password-protected levels (for the user and the installer).

Practical: O-View is your portable office, and can be connected just when programming or for maintenance, or can be installed permanently on site to exploit all the benefits of local or remote centralised management.

OVBT

Bluetooth connection module for O-View interface.

O-View Software Suite enables connection via PC or PDA to O-View in the vicinity of the system, to intervene on the control units on the BUS T4 network. Maximum connection distance 15 m.

The interface of O-View Software Suite has been specially designed to enable rapid access to all parameters of the connected devices without the need for physical access, as well as quick diagnostics of malfunctions by consulting the event log, all the most practical and intuitive way possible.

The O-View control function has been expanded: in just one PC screen, all applications connected via BUS T4 can be controlled.

O-VIEW SOFTWARE SUITE

This application, supplied with OVBT and OVBTGSM, as well as expanding the functions of O-View enables the creation of a database of installations with personal data of clients and configurations of each system, even on more complex versions.

There are two versions of software: O-View Desktop designed for installation on a PC and O-View Mobile which enables use of the functions of the desktop version on a smaller screen of a PDA or Smartphone.

By connecting to the site www.nice-service.com users can download the constantly updated firmware and software versions.

Minimum requirements

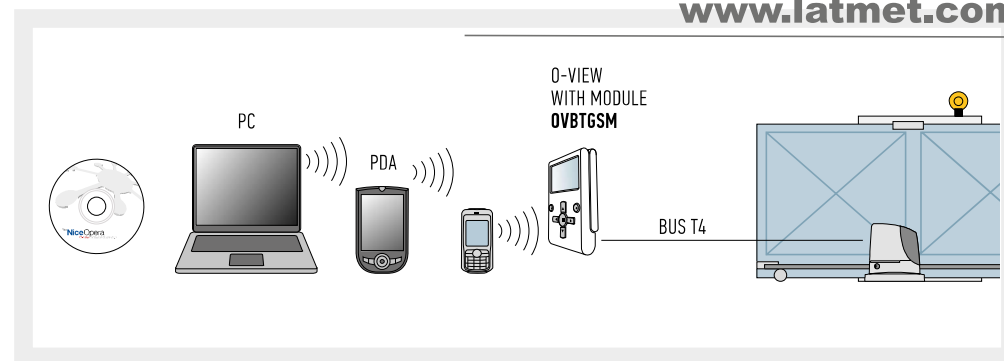

O-View Mobile version for PDA palmtop:

- Processor: (300 MHz) Recommended by Nice: (> 300 MHz)
- RAM: 64 MB Recommended by Nice: 128 MB
- Storage memory: 5 MB Recommended by Nice: 20 MB

Note: software installation includes installation of the program Microsoft® .NET Framework Redistributable 2.0.

OVBTGSM

In addition to the benefits of the OVBT module, the automation or network of automations can now be **controlled via GSM** by connecting O-View to the system via BUS T4.

A GPRS connection also enables connection via the Internet to O-View to obtain all management functions offered by the software from any location with no need for presence on site.

The user can remotely control the automation via GSM, from any of the enabled numbers, and check status, such as opening a gate by means of a phone call or by sending 4 different controls via SMS text message, with the security offered by entry of a unique password.

O-BOX

OPERA

O-Box is the multi-function interface which, thanks to the dedicated software **O-Box Software Suite**, enables **the configuration and programming directly from the PC or PDA**, practically and intuitively, **all transmitters, receivers and other Nice control devices**.

The convenience of remote control:

O-Box enables a number of tasks to be performed directly from the office, **without the need to visit the clients system**. For example the operator can program the functions and parameters of transmitters with the utmost of ease, and send them already configured and operative to the clients.

It is also possible to:

program transmitters in the One series via radio;
manage all functions via radio of the receivers in the One series fitted with built-in transmitter;
read and write transponder badges in the Moon series;
receive data via radio from transmitters in the series Smilo, VeryVE, Flo, VeryVR, FloR, One, Niceway or via optical reader for transmitters in the Bio series;

program receivers in the series Smilo, Bio, FloR and One and memories of the control devices MOMB, MOTB and MORX;
create and manage an updated database with personal data of clients and configurations of the receivers installed in the respective systems.

O-Box interfaces with your PC or PDA palmtop, performing the control, entry, deletion, enabling or disabling of codes, programming of the memory, functions and typical parameters of the receivers, transmitters and other Nice control devices.

The software O-Box Software Suite

can be installed quickly and easily either on PC (O-Box Desktop version) or on PDA palmtop (O-Box Mobile version).

Universal: O-Box manages all programming procedures possible by means of BUPC.

It also enables import of databases previously created using the software for BUPC.

OX4T

OPERA

Universal 4-channel receiver in the One series, with built-in transmitter.

For remote control of any automation on gates, garage doors, road barriers, shutters, awnings, venetian blinds, irrigation and lighting systems or other electrical circuits.

Equipped with BUS T4 connector for connection to O-View.

An extended system:

OX4T manages 4 outputs controlled by 4 relays, usable as power relays or voltage-free contacts, to extend use of the Opera system also to devices with specific provisions.

Thanks to the internal transmitter, OX4T can be used as a repeater, thereby increasing the operating range between transmitters and other receivers in the One series.

Practical and functional:

OX4T can be connected via radio to the interface O-Box and via BUS T4 to the multifunction display O-View, to enable programming, diagnostics, timed functions and management of codes, also remotely by means of the modules OVBT and OVBTGSM.

2 programming modes:

Mode I and the new extended Mode II which enables expansion of the number of controls to up to 14.

Multicode: OX4T is also compatible with the transmitters with encoding system O-code, Smilo, Flo, FloR, FloR and TTS.

OX4T is fitted with removable terminals to facilitate connections and a generously sized memory to enable storage of up to 1024 transmitters, with the option for password protection.

TAG SYSTEM

Ideal for restorations and upgrades of existing systems.

The Tag system, disappearing inside standard wall mounted plates and suitable to confined spaces, are ideal for restorations and upgrades of existing systems to control home automations, lighting points and all loads up to 500 W not directly accessible from cable controls.

All without the need to replace the existing system or involve building work!

1. TTX4: recessed transmitter with mains power supply. Ideal for the control of automations not directly accessible from cable controls.

2. TT2N: miniaturised control unit for control of a 230 Vac motor up to 500 W, with built-in radio receiver.

3. TT2L: miniaturised control unit for control of lighting systems, with built-in radio receiver.

4. TT2D: miniaturised control unit for control of lighting systems from multiple points, with built-in radio receiver and switch.

Invisible, but highly effective

Since miniaturised control units are incorporated invisibly into ordinary wall plates, they allow quick and easy installation and unbeatable safe, precise connection with all system components. Extremely compact size.

Perfect for every home

Ideal in renovation projects and when upgrading existing systems to control home automations, all with no need to replace the existing system or do any building works! What could be more discreet? Its Nice!

Comfort and simplicity always

Tag system coupled to the transmitter range. With just a simple touch, NiceWay module allows the wireless control of awnings and shutters, automation, irrigation and lighting systems and all loads up to 1,000W/500 VA not accessible by cable and, what's more, offers the option of wire connecting the miniaturized control unit to the existing wall switch in order to get an additional control point.

TTX4, TTXB4

TTX4, with mains power supply and TTXB4, with long battery life power.

Optional connection of up to 4 pushbuttons for cable control of automations.

Recessed transmitter ideal for the control of automations not directly accessible from cable controls.

433.92 MHz frequency, with 52 bit rolling code (over 4.5 million of billion combinations).

TT2

Mindy TT miniaturised control units, totally compatible with the Nice transmitters in the series Era, NiceWay, Flo, Very, Planotime, FloR and Smilo.

Maximum flexibility: can memorise up to 30 transmitters in Mode I and Mode II.

Fast programming thanks to the programming button. An indicator LED helps the user to follow the correct programming procedure, for example signalling when the set thresholds of the climatic sensor are exceeded.

Possibility of connection to climatic sensors Nemo and Volo S-Radio.

IP20 protection level.

TT2N, control unit for 230 Vac motor up to 500 W, with built-in radio receiver.

Possibility of connecting a pushbutton for cable control in mode STEP-BY-STEP - ALWAYS UP - ALWAYS DOWN.

Possibility of memorizing radio controls in
Mode I: UP - STOP - DOWN - HOLD-TO-RUN DOWN
Mode II: STEP-BY-STEP - UP STOP - DOWN STOP - STOP -
HOLD-TO-RUN DOWN - HOLD-TO-RUN UP.

TT2L, control unit for lighting systems, with built-in radio receiver.

For the control of 230 Vac mains voltage loads with power up to 1000 W / 500 VA.

Simplified connections thanks to the switch connected directly to the power mains (not for TT2D).

Possibility of connecting a switch for cable control in ON/OFF mode.

Possibility of memorizing radio controls in

Mode I: ON - OFF

Mode II: ON/OFF - HOLD TO RUN - TIMER1 - TIMER2.

Connection to climatic sensor Volo S-Radio enables management of light activation and shutdown by means of the Sun sensor.

Programmable timer from a minimum of 0.5 to a maximum of approx. 9 hours; optimised programming procedure, maintaining set values also in the event of a power failure.

TT2D, control unit for lighting systems from multiple points, with built-in radio receiver and switch.

Same characteristics as TT2L.

NICE ERA PHOTOCELLS, SELECTORS & PROXIMITY READER

**The new Nice generation of optical devices
for automation safety,** available with Nice BlueBUS technology
for a simplified installation.

**Three different sizes of photocells
synchronized to meet any need and complete
the safety and comfort of every automation
system,** also in the tightest spaces, perfect
for use with renovations to cover annoying
existing set-ups.

> SLIM

With only 30 mm width,
also in burglar-proof version,
ideal for tight spaces.

> MEDIUM

In burglar-proof and positionable versions,
ideal for the most popular systems.

> LARGE

Positionable, also in versions for recessed
mounting with 9 mm projection, ideal for concealed
installations.

> ERA KEYPAD

Extremely strong metal body, 27 millimetres depth and only 13 mm from the wall for the recessed mounting version.

DIGITAL SELECTOR WIRELESS (EDSW6)

Digital selector in burglar-resistant version 13 keys.

DIGITAL SELECTORS (EDS)

Digital selector in burglar-resistant version for outdoor and recessed installation.

KEY SELECTORS WITH EUROPEAN CYLINDER (EKS)

Key selectors in version for outdoor or recessed mounting.

KEY SELECTORS WITH STANDARD CYLINDER (EKS)

Key selectors in version for outdoor or recessed mounting.

PROXIMITY READERS (ETP)

Proximity readers for card and badge reading.

TRANSPONDER BADGE

Convenient transponder badge with a practical through hole to add the key chain on.

> ERA TRANSPONDER READER

Transponder proximity reader for cards and badges with customized programming.

ERA PHOTOCELL S

NEW BLUEBUS

Fixed, synchronized photocells Slim, also with Nice BlueBUS technology.

Safe:

D type device according to specification EN12453 which allows to pick-up obstacles on the optical axis between transmitter (TX) and receiver (RX).

Using the fototest function it is possible to achieve class 2 safety fault according to specification EN 954-1.

Cutting-edge technologies:

antiglare circuit which eliminates possible sunlight interference.

ERA KEY SWITCH

NEW

Key selectors for outdoor and recessed installation with automatic return lock, European or standard cylinder.

Selectors in burglar-resistant version with metal shell.

Wafer thin:

only 13 millimetres depth from the wall in the recessed versions (32 and 45 millimetres in the outdoor versions).

Electrical contacts and levers protected by plastic container.

Employable as direct motor command in applications with mains power source (230 Vac).

Flexible solution:

recessed versions with bowl supplied, for new installations or existing setups with adaptor EKA02.

ERA TRANSPONDER READER

NEW

Transponder proximity reader for cards and badges, bimodal transmitters Flor-m, also with Nice BlueBUS technology.

Easy programming:

2 programming modes: Easy or Professional; allows you to determine which cards/badges are enabled on the system; possibility of programming the number of uses available to a specific card or badge; 255 storable cards/badges expandable, on ETP, up to 510 cards/badges with a second additional memory BM1000.
2 modes (static and dynamic) to activate two different commands (ETP version).

With a O-Box interface you can manage easily any kind of programming of the BM1000 memory, in proximity of the system or also at a distance, directly from the office of the installer.
O-Box is interfaced with the PC, thus allowing an orderly storing of all installations.

Nice BlueBUS technology:

available with BlueBus system which allows an easy connection to the control unit of all devices with only two wires, by simply connecting them in parallel and other exclusive functions:
2 modes (static and dynamic) for the activation of two different commands chosen among 6 available ones (for example, step operation, close, open), depending on the control unit to which they are connected to;
possibility of inserting an automation block/unblock function; up to 4 control devices EDSB/EDSIB and ETPB which can be connected via BlueBUS, also with a mixed configuration;

Transponder badge HSB1

Practical in use, can be added to the key chain so as to be always available.

Optimal efficiency, extra long life:
the two 1 W-Leds guarantee a lifetime of 70.000 hours (continuous use).

Horizontal, wall or ceiling mounting: combined with the possibility of orienting the light beam and compact dimensions of the IP44 box, use of Wallyght is even more flexible.

Multi-function LED indicator.

The only version with 12/24 Vac/Vdc
power supply and flashing light function, courtesy light function or dusk sensor function.

A new idea for improved safety:
when connected to compatible control units, Wallyght can act as a normal flashing light, or provide ambient lighting like a fixed courtesy light. When connected to a 12/24 Vac/Vdc output, Wallyght can remain permanently lit, and also be activated at dusk to then turn off at dawn thanks to the integrated dusk sensor.

NICE SOLEMYO AIR NET SYSTEM

**Automation safety devices becomes
wireless control systems!**

Photocells, sensitive edge and flashing lightings all acquire a new function: power is supplied by means of an integral miniature solar panel. The solar panel powers rechargeable batteries to ensure independent operation of the automation system in any conditions.

SOLEMYO

SOLEMYO 24V

Solemyo is the solar power system to automate gates, garage doors and road barriers, even those located far from the electrical mains.

Solemyo is available both in kit version and single products.

Installable anywhere without the need for connections or excavations, even in the most remote locations or those difficult to access with the power mains.

Increased savings and respect for the environment thanks to solar energy, free and clean: an ecological and intelligent choice with short term benefits.

Low consumption with no risk of blackouts: the extended duration of the energy reserve, combined with the low consumption of the automations, guarantee operation also in prolonged overcast conditions.

THE KIT CONTAINS:

SYP: PHOTOVOLTAIC PANEL FOR 24 V SUPPLY.
PSY24: 24 V BATTERY BOX WITH CONTROL CIRCUIT AND CARRY HANDLES. IT STORES THE ELECTRICAL ENERGY PRODUCED BY THE SYP PANEL, WITH CONTINUOUS AND PERMANENT SUPPLY THROUGHOUT THE DAY.
CABLES AND CONNECTORS NECESSARY FOR THE CONNECTION.

Less consumption, more autonomous operation!
 Perfect operation ensured even at night time or in prolonged overcast conditions, guaranteeing comfort and safety.

Ease of use

The SYA1 auxiliary power supply unit enables rapid battery charging via a 230 Vac power mains, as an alternative to the photovoltaic module. Battery charge status LED indicators.

Installation advice

If two or more parallel-connected solar panels have to be installed, purchase individually the items that make up the Solemyo system to increase the systems charging capacity or use just one SYA1 transformer to charge several PSY24 battery boxes.

FLEXIBLE: SOLEMYO ADAPTS PERFECTLY TO ALL TYPES OF INSTALLATION.

The SYP30 photovoltaic panel, sold individually, is ideal in all the situations with low exposure to the sun or automations with high intensity of use.

NICE SOLEMYO AIR NET SYSTEM

So many benefits!

Quick installation: no need to lay wiring to connect the accessories to the control unit, drilling holes or laying raceways: just position them as appropriate and let the control unit identify them.

Devices interface with the control unit by means of a special, very compact interface module that can be fitted directly inside the motor, or the control unit, if separate.

Better appearance, flexible positioning of devices over time: it is very easy to add (or remove) devices, with no need to search for a mains connection point or a contact for series connection.

Extremely reliable transmission:

the radio system allows two-way communication - each device does not just respond to the control units instructions but sends a feedback signal, confirming that it is present and operational, and it also signals the occurrence of events such as the passage of an object between the two photocells.

Operating Frequency: 868 MHz, less liable to interference.

Two separate channels are used, for a 100% guarantee of the systems operation and safety even in case of sudden interference.

Intelligent system: it detects whether any interference is from another Nice wireless automation unit. In this case, the new automation system just installed selects two communication channels different from those used by the existing system, keeping the two systems channels separate.

Each device has LEDs in the bottom indicating the signal quality and troublefree operation of the system, which can be checked immediately in the event of malfunction or at first start-up.

A LED flashes when the device is receiving enough solar power to allow recharging.

Solemyo Era Photocell

Pair of PHW two-way wireless photocells, with photovoltaic cell power supply.

Easy installation: the receiver photocell has a special LED that indicates the degree of alignment with the transmitter photocell, very useful during initial installation.

Solemyo Era Light

Wireless LLW flashing light, with extremely high-efficiency LEDs lower consumption and virtually unlimited lifetime (no more blown lamps needing frequent changing).

Light output adapts to ambient conditions to ensure good visibility even in direct sunlight and to save energy during the hours of darkness.

Can be used as flashing signal or courtesy light.

ERA TCW

NICE&SAFE

Even safer automation thanks to the Nice Solemyo Air Net Systems new sensitive edge sensors.
No connection, totally wireless, powered by the sun.

Energy saving
 thanks to the solar power cell built into the TCW2, with rechargeable batteries.

Version with battery-only operation is also available in case of installations with low exposure to sunlight.

Unbeatable safety thanks to the wireless system for detection and communication between sensitive edge, interface and control unit, allowing swift action when an obstacle is detected.

Quick and easy to install:
 maximum flexibility in installing the devices.
 Possibility of connection to 8.2 KOhm resistive sensitive edges.

State-of-the-art technology: IBW interfaces, for Nice BlueBus-compatible control units, and **IRW**, interfaces, for control units without BlueBus connection, allow radio communication with **TCW** sensors.

INSTALLATION DIAGRAM

*IBW or IRW depending on the motor (only IBW accepts also PHW and LLW)

TCW + IBW

The IBW is connected to the control units BlueBUS terminal and communicates with the TCW by radio. Compatible also with PHW wireless photocell and LLW wireless flashing light.

TCW + IRW

IRW is connected to safety input (Stop and Photo) of control unit and communicates via radio with TCW.

8.2 KOhm resistive sensitive edges, maximum safety and control of the automation.

Safer: if there are any faults in the system like, for example, the product itself has broken down, the edges will communicate this to the control unit. The TCE interface board enables users to connect sensitive edges (with 8.2 KOhm resistance) to those control units which are not equipped with a special input.

The length can be personalised:

the components supplied in the kits enable installers to build sensitive edges of the correct dimension.

Practical: they adapt to any kind of situation and can be installed quickly.

Reliable: the new Class3 technology means that the control unit, the sensitive edges are connected to, can understand if the device is functioning correctly, or if it is out of use.

8.2 KOhm analogical-type input.

BLUEBUS

Optical device, with wireless transmitter to secure on moveable leaf, horizontally adjustable through 210° and 30° vertically, for an automation according to Standards.

Consideration towards personal safety and product quality.

The safety level of the main edge, required by the EN12453 standard, can be achieved for any type of use and any type of activation by integrating a FT210/FT210B device to an 8.2 KOhm TCB65 type resistive sensitive edge.

The FT210/FT210B device, integrated with a resistive sensitive edge (8.2 KOhm), is safe against individual faults (category 3 according to the EN 954-1 standard) or can be used with automated systems with self-diagnosis at the start of every manoeuvre (category 2 according to the EN 954-1 standard).

Additional models

Versions with relay output (FT210), with Nice BlueBUS technology (FT210B), available with 2 Ah (FTA2) and 7Ah (FTA1) battery Kit, for intensive use.

Cutting-edge technology

The anti-collision circuit avoids interference with other out-of-sink receivers.

The FT210/FT210B optical devices are equipped with a special sensor capable of recognizing when the gate is motionless, which remains in a low consumption mode and activates only when the gate is in motion. Range adjustable on 2 levels; alignment with proportional LED for easy and safe installation.

Suitable for any architectural environment and easy to install

Reduced dimensions: 46x128x45; electrical connections can also be made from the lower section of the box.

F210

BLUEBUS

Synchronised photocells horizontally adjustable through 210° and 30° vertically. Simply perfect installations.

The 210° solution

The beam of the Nice F210 and F210B photocells has a horizontal scope of 210°, thereby increasing the safety level of the system and simplifying installation: the gate or garage door to be automated quite often slide flush with the wall making it very difficult to position the photocell.

Numerous models and countless advantages

The new photocells are available with relay output (F210) or with the Nice BlueBUS technology (F210B). With the BlueBUS technology, all devices can be easily connected to the control unit with just two wires. Sensors with the BlueBUS technology can be connected to incompatible control units by means of an IB interface. The devices that are connected to the BlueBUS network are automatically acquired by the system.

Suitable for any architectural environment and easy to install

Reduced dimensions: 46x128x45 mm; electrical connections can also be made from the lower section of the box.

Resilient and safe

Polycarbonate casing; FA1 vandal-proof metal shell (optional).

Cutting-edge technology

The problem of interference between the sensors and the automatic synchronisation between several pairs of photocells is solved by the anti-blinding circuit; high range adjustable on 2 levels; synchronising circuit; alignment with proportional LED for easy and safe installation.

KIO

KIO, key-operated selector switch for low voltage contacts, with release mechanism for metal cord, ideal for the automation of sectional doors, folding doors and rolling gates.

User-friendly:

Kio is both a key-operated selector switch and a release device. Its design makes it very convenient and effortless to use, and easy to install anywhere thanks to its very narrow outline.

Long-lasting: Kio is made of cast aluminium, epoxy powder coated for greater durability.

Easy: LED allows you to locate the selector switch even in total darkness.

More safety: coded key.

Release device activated directly by opening the door or by the winding device.

The very first product to incorporate the key-operated control and release motor functions.

KIOMINI

KIOMINI, aluminium key switch with control and release mechanism for metal cord.

Practical: KIOMINI is both a lever for the release mechanism for metal cord and a control mechanism for the direct or through a control unit activation of a single phase motor.

Resistant: a vandal-proof die-cast aluminium casing.

The access to the sector is possible by a thick door with closing key.

Comfortable: thanks to its small dimensions, it is easy and compact to install.

HEATING DEVICE

PW1, heating element: it maintains a suitable temperature for the automation system to operate correctly, **even under the most severe of weather conditions.**

This is a particular type of **resistance** that can reach temperatures close to 100°C under normal environmental conditions.

Effective: each element has a consumption of 20 W and is extremely efficient thanks to the silicone sheath that covers the resistance and increases the diffusion of heat.

Indipendent: the device is directly fed by a 230/120 Vac power supply through the TW1 thermostat, and because it doesn't burden the transformer of the product itself, the performance characteristics of the gear motor remain the same.

TW1, regulation thermostat for PW1:

when the detected temperature drops below the set threshold, the thermostat activates the heating element PW1 thereby slowly increasing the internal temperature of the product itself; the heating action is maintained until the detected surrounding temperature stabilizes at the set levels.

Easy to program: the intervention threshold can be regulated between 0°C and -20°C.

Safe: equipped with a button so that an operational test can be performed at any time. The status of the outputs is continuously verified by means of Leds.

MOONCLEVER

SOLEMYO OPERA BLUEBUS 24V

Control unit for 24 Vdc gear motors with magnetic encoder, for swing gates.

Equipped with Nice **BlueBUS** technology and compatible with the **Solemyo** solar power system and **Opera** system for management, programming and diagnostics of automations, also remotely.

Compatible with the Opera system, which thanks to the 0-View multi-function display enables personalisation of the system, modifying the opening and closing positions, leaf offset and deceleration intervals, and diversifying parameters such as force, speed, and obstacle detection for each motor.

Microprocessor logic: in addition to the classic functions such as intelligent clutch with anti-crushing safety device, gradual start-up and deceleration, automatic memorisation of both travel limit positions and the pedestrian door function, Moonclever also offers the advantages of the Opera system.

Safe and reliable thanks to obstacle detection with dual technology and monitoring of motor absorption and speed via the encoder, throughout door/gate travel, with provision for connection of latest generation resistive sensitive edges.

Intelligent: on start-up, indicator to confirm correct power supply and efficient operation of the control unit; automatic fault diagnostics and signalling via the flashing light and confirmation leds.

Savings, respect for the environment, and autonomy: when connected to the buffer battery or Solemyo kit, consumption on standby is reduced to just 0.1 W.

Installation couldn't be simpler, thanks to the system BlueBUS, enabling connection of the control unit, motors and accessories by means of just two wires.

No black out: operation in the event of a power failure by means of optional batteries (PS124) with compartment in control unit.

Radio receiver: provision for insertion of SM snap-fit receivers.

NICE SERVICE FOR YOU

NICE SERVICE FOR YOU: QUALITY, SAFETY AND LONG LIFE

THE CARE OF THE PRODUCT AND TO THE EUROPEAN STANDARDS
IN ORDER TO GUARANTEE THE SAFETY OF YOUR AUTOMATION.

NICE INFORMS

To reinforce the companys relationship with professionals and provide serious and complete training, **Nice offers a packed program of training courses on products, installation techniques, programming and updates.**

Particular attention and exhaustive coverage is dedicated to current European legislation and standards, with the aim of simplifying the procedure to obtain the declaration of conformity and guarantee the complete safety of the automation systems installed.

THE NICE EFFORT FOR CUSTOMERS AND AUTOMATION PROFESSIONALS

AFTER-SALES SERVICE

Nice guarantees an **efficient and punctual service**, including on-line: every Nice customer can surf on the new website www.niceforyou.com and consult all documentation on products and spare parts, together with constantly up-to-date technical information and the possibility to download installation manuals.

EPM0B	Era Photocell M, pair of outdoor photocells, with Nice BlueBUS technology	189
EPS	Era Photocell S, pair of outdoor photocells slim	187
EPSA	Era Photocell S, pair of outdoor photocells slim, burglar-resistant metal body	187
EPSAB	Era Photocell S, pair of outdoor photocells slim, with Nice BlueBUS technology, burglar-resistant metal body	187
EPSB	Era Photocell S, pair of outdoor photocells slim, with Nice BlueBUS technology	187
ERA P VIEW	Multifunction radio transmitter with intuitive graphic interface, to manage up to 99 devices singly or in groups	159
ETP	Era Transponder Reader, proximity reader for transponder cards MOCARD and MOCARDP to be combined with the MORX decoder	195
ETPB	Era Transponder Reader, proximity reader for transponder cards with Nice BlueBUS technology	195
F210	Pair of synchronised photocells, with relay output	207
F210B	Pair of synchronised photocells, with the Nice BlueBUS technology	207

CODE	PRODUCT LINE	PAGE
FA1	Vandal-proof metal shell for optical devices	206
FA2	Bracket for fixing vandal-proof metal shell to MOCF and MOCF2 columns	206
FLO1RCE	Era FloR transmitter, 1 channel, with sequential code for multiple insertion	165
FLO1RE	Era FloR transmitter, 1 channel	165
FLO2RCE	Era FloR transmitter, 2 channels, with sequential code for multiple insertion	165
FLO2RE	Era FloR transmitter, 2 channels	165
FLO4RCE	Era FloR transmitter, 4 channels, with sequential code for multiple insertion	165
FLO4RE	Era FloR transmitter, 4 channels	165
FLOX2R	Universal receiver, 2 channels with BM250 memory	161
FT210	Pair of optical devices for sensitive edges, with relay output	206
FT210B	Pair of optical devices for sensitive edges, with BlueBUS technology	206
FTA1	7 Ah battery kit for FT210/FT210B transmitters, for intensive use	206
FTA2	2 Ah battery kit for FT210/FT210B transmitters	206
GR170	Giro, Irreversible gear motor, with brake and release device, lifting force up to 170 kg	150
GR170E01	Giro, Irreversible gear motor, with brake and release device, lifting force up to 170 kg, power supply cable included	150
GR170R	Giro, Reversible gear motor, without brake, lifting force up to 170 kg	150
GR170RE01	Giro, Reversible gear motor, without brake, lifting force up to 170 kg, power supply cable included	150
GR340E01	Giro, Irreversible gear motor, bi-motor with brake and release device, lifting force up to 340 kg, power supply cable included	150
GRA01	Giro accessory, second motor for GR170 complete with accessories for simultaneous release	151
GRA02	Giro accessory, adapter for 48 mm diameter shafts	151
GRA03	Giro accessory, adapter for 240 mm diameter pinion	151
HK7024	Hyke, Motor for swing gates up to 3.5 m, with articulated arm and control unit	66
HK7024HS	Hyke HS, Hi-Speed motor for swing gates up to 3 m, with magnetic encoder, complete with articulated arm and control unit	28
HK7224	Hyke, Motor for swing gates up to 3.5 m, with articulated arm	66
HK7224HS	Hyke HS, Hi-Speed motor for swing gates up to 3 m, with articulated arm, without built-in control unit	28
HKA1	Hyke, Spare control unit for HK7024	67
HKA2	Hyke HS accessory, Spare control unit for HK7024HS	29
H07124	Hopp, Motor for swing gates up to 2.4 m, with articulated arm and control unit	62
H07224	Hopp, Motor for swing gates up to 2.4 m, with articulated arm, without control unit	62
