

LAT MET MISSION

to create, manufacture and sell qualitative and practical metal products with excellent design. By listening to client's wishes Lat Met experts make sure that every client receives the best technical solution. Raising welfare and satisfaction of our product users, Lat Met employees and everybody involved.

LAT MET VISION

to become a stable and secure long-term supplier in the Baltic States and the Scandinavian countries, due to the quality of products and the developed customer service. To become the best and fastest growing metal gate, fencing and other urban object manufacturer in the Baltics.

ABOUT LAT MET

Janis Suvkans founded this family enterprise shortly after the Independence of the Republic of Latvia was restored.

In **1996** the company started its activities in the field of metal product manufacture. Initially the company manufactured wrought iron fireplace accessories and garden gates upon individual orders.

In **2002** workshop from private home garage was moved to more spacious premises in the outskirts of Valmiera. The management of the company was handed over to son Aigars Suvkans.

In **2004** the company registered new trademark – Lat Met. Simultaneously the company extended its sphere of activities by starting the trade and mounting of NICE gate automation systems and Ryterna garage doors in Latvia.

In **2011** "Lat Met" Ltd. finished the reconstruction and improvement of new manufacturing workshop, with help of European Union funding. Company started its activities in renovated manufacturing premises, located by the A3 highway, 90km from Riga.

In the beginning of **2013** "Lat Met" Ltd. introduces the quality management system ISO 9001.

LAT MET METALWORK WORKSHOP

SPECIALISATION

Lat Met metalwork workshop has specialised in manufacture of practical decorative metal products – swing gates and sliding gates, stairs and railings, fencing, trade stands, environmental objects, different non-standard metal products, with weight usually not exceeding 1t and length not more than 12m. (Depending on product's technical specification, its weight and dimensions may be bigger).

TECHNICAL EQUIPMENT

Currently the total area of metalwork workshop and the administration building is 1050 m².

The 5-hectare manufacturing territory includes asphalted areas and other buildings, which serves as warehouses for metal products. The company's most valuable asset is its experienced employees.

„Lat Met“ Ltd. possesses workbenches for metal cutting, grinding, metal sheet and profile bending, forging turning, MIG/MAG/TIG welding, sandblasting equipment, coating equipment (powder coating and wet coating), as well as all the required mounting equipment. Due to the co-operation with sub-contractors, the company provides its clients with CNC sheet cutting, CNC sheet bending, CNC turning, CNC milling and hot dip galvanization.

OUTPUT

Among the best sold Lat Met products are metal swing gates and sliding gates for private houses and objects of industrial importance. Considerable part of output consists also of fencing sections, railings, stairs, awnings, park benches, waste containers, bicycle stands, road separation barriers, etc. In order to facilitate the choices for clients, we have compiled the most popular Lat Met products in a catalogue. Thought-out and systematized manufacturing technology allows the company to raise its efficiency and quality of products, thus, securing better conditions for our clients.

INDIVIDUAL ORDERS

„Lat Met“ Ltd. accepts all kinds of individual orders that are within the scope of company's specialization and technological resources. Currently the company successfully co-operates with construction companies. Basing on the given architectural drawings, Lat Met manufactures all kinds of fencing and small metal constructions.

In case client wishes to make an individual order, but does not have drawing or project, Lat Met expert can be hired as technician or draftsman, prior agreeing about the volume and conditions of work.
